BIO

A fullstack developer with 2+ years of building performant web applications using React, Node.js, and Firebase. Passionate about clean architecture, scalable systems, and user-centered design. Open to freelance or full-time roles.

SKILLS AND TECH STACKS

Frontend: React.js, HTML, CSS, JavaScript, Vite

Backend: Node.js, Express.js, Firebase, MongoDB

Others: SEO, Web Performance, Business Monetization Strategies

PROJECTS

1. Apex Flick – Competitive Web Game

A fast-paced Nigerian cash game platform where users flip cards to win rewards and top daily leaderboards.

Stack: React, Firebase (Auth, Firestore), TailwindCSS

Features:

Real-time user tracking and ranking logic

Admin dashboard to manage gameplay sessions

Game play animations and user interface optimization

Dynamic ad integration for monetization

Live: [<https://apexflick.vercel.app>]

2. Campus Icon – Campus Community App

A social competition platform for students to upload videos and join campus-based contests like “Best Dancer” and more.

Stack: React, Firebase, Paystack API, TailwindCSS

Features:

Video uploads with user profiles and feeds

Competition system with in-app coin purchase for entries

Integrated Paystack for seamless payment

Real-time leaderboard and voting mechanics
